

Production Equipment

Impression® 4000 Series CD/DVD Duplicator

US Patents 5,975,839; 6,024,532, 6,113,345

Introducing the Ashby Impression® 4000 Series Automatic CD/DVD Duplicator. Now the same patented Gravity Feed Design that has made Ashby Floppy Disk Duplicators the reliable production solution since 1983, makes the Impression® 4000 the ultimate choice for CD/DVD production today. No servo, stepper or DC motors. No belts, gears or pulleys. In fact, no robotics at all. Industrial all aluminum construction and bulletproof pneumatic operation is clean and simple, intended for the long, long haul. Rugged enough to withstand 24/7 operation, yet quiet enough for the office media room, the Impression® 4000 is as easy to use as the office photocopier, but has all the features needed for professional duplicators. The 200 disc hopper capacity means unattended operation for up to 3 times as long as the competition. Upgradable firmware means support for the fastest drives as they become available. The wait for an ultra-reliable CD/DVD production alternative is over.

Features:

- Stand alone machine - no PC required
- Unattended CD/DVD duplication
- All aluminum construction
- Super fast load/unload cycle
- Gravity Feed Design
- Smooth, industrial quality pneumatic components
- Huge 200 disk hopper capacity
- Unique, patented disc singulation
- Operates with 1 to 8 drives
- Separate bin for rejected discs
- Internal hard drive for multiple master image storage
- First-In, First-Out (FIFO) hopper system
- No regular maintenance required
- Supports virtually all CD/DVD formats
- Auto detection of disc format
- Copy or compare data operation
- Batch mode
- Simulate mode for test runs
- User definable quantities
- Multiple image hard drive
- Complete image file management
- Upgradeable firmware for future drive support
- Comprehensive but simple user interface
- Audio compilation mode

Configurations:

Drives

up to 8 CDR-52X Drives

up to 6 CD/DVD-16X(48X) Drives
