Model 800M Floppy Disk Duplicator

The Ashby 800M Series is a simple to operate yet completely professional, high quality duplicator. This machine has a practically flat learning curve and can be used within minutes by anyone who can operate the office photocopier. All the features demanded by duplication pros are here: batch processing, adjustable window margin control, built-in formats, user-defined precompensation plus unique features like write protect inversion for batch processing with write protected disks, and re-chucking to help insure proper disk chucking on today's ultra high speed drives.

Features:

- Patented Gravity Feed Design
- Pass-Through Drives
- All aluminum construction
- Smooth, industrial quality pneumatic components
- Built-in high speed duplication controller
- Huge 100 disk hopper capacity
